

Theلودerma cortical

Vietnamese Mossy Frog

Distribution: Vietnam

Habitat: Tree dweller often found on the bark of trees overhanging water.

Size: 3" - 3.5"

Trade availability: Scarce

Captive Care

Space: A 29 gallon high or 24x18x24 Exo Terra is suitable for 3 adults.

Substrate: Rocks or branches forming about ¼ to ½ of the tank as land.

Plants: Live, dense plants such as pothos, ficus, and philodendron.

Water: A highly aquatic species, approximately ⅔ to ¾ of the tank should be water. Run a pump from one side of the terrarium over a pile of rocks to form a waterfall, this creates constant humidity and biological filtration.

Temperature: Day temperatures no higher than 82°F
Night temperatures around 68-70°F

Humidity: 90% covered, 10% ventilated is recommended. Glass, plexiglass, or Saran Wrap on a screen lid works well.

Lighting: 2% UVB for 12-14 hours a day is required for frogs 2 months and older, no more than 3% UVB. UVB is essential for the frog's growth! It will also help eliminate excess bacteria growth in the tank.

Food: Juveniles: ¼" crickets
Adults: ¾" crickets and similarly sized roaches

Dust all food with a 3:1 ratio of Rep-Cal Herptivite to Rep-Cal Calcium with Vitamin D3.

Thank you for your purchase! Feel free to contact us if you have any questions about your new pet!
